

AIA is an organization within Federchimica (Italian Chemical Industries association) with a marked focus on technical and regulatory issues in the aerosol world. On one hand AIA has strong connections with the associated companies and, on the other hand, has an international view thanks to its role in FEA. AIA is characterized by its direct relationship with every associates company that not only receives but also actively contribute in improving the services by offering their know how in the field and their overall wealth of experience, needs & suggestions. We strongly believe that listening to the needs of associated companies is the foundation for an active and dynamic association which we want to be.

With my scientific research background I will promote innovation as the key to competitiveness. Therefore, I will promote the relationships and connections between universities and industries. The interconnection between these two worlds is essential for survival in the fast growing economic and social environment we currently live in.

Francesco Maestri President AIA

WE ARE
THE 4TH
AEROSOL
PRODUCER IN
EUROPE

### **ABOUT US**

AIA, Associazione Italiana Aerosol represents more than 70% of aerosol industries. Italy is the 4th aerosol producer, in Europe

Founded in 1963, Aia is a member of **Federchimica** (Italian Federation of Chemical Industries) since 2012. AIA membership counts **61 companies**, and a turnover of **3,8 billion** euro.

ASSOCIATES
COMPANIES

# OUR ENGAGEMENT

We engage ourselves in promoting the knowledge and the image of Italian aerosol industry, with activities addressed to guarantee the quality and the safety of our products and the security of our workers.

**AIA** sustains environmental activities in order to either protect the consumers or promote a sustainable behaviour.

# INDUSTRIAL SECTORS

We represent all the aerosol industry from suppliers of components to producer of finished goods: can makers, valves and cap producers, propellants and raw material suppliers, fillers and marketers of aerosol products.

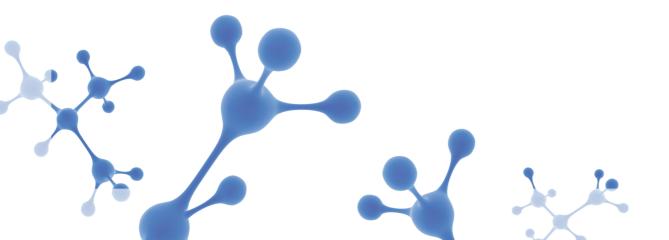

# MAIN USES

Aerosol products are widely used in several areas from consumer goods to technical products:

cosmetics (hair spray, deodorants), household (starches, air freshers, insecticides), lacquers and varnishes, food (whipped cream, oil), automotive (cockpit cleaner, brake

cleaner), veterinary and pharmaceutics, technical (detachers, PU foams, degreasers), sanitizers.

### **OUR ACTIVITY**

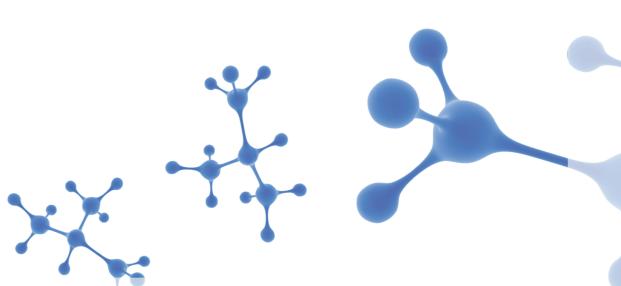

**AIA** supports continuously the associates: providing information on **Italian** and International legislation, liaising with main industrial and institutional networks,

supplying economical and technical data in order to help the associates improve innovation and research, studying communication strategies addressed either to associates or to consumers.

AIA promotes initiatives

related to **environmental responsibility**, with a target to protect our future generation.

### **OUR NETWORK**

**AIA** take parts to a international network of companies and associations working in chemical industry.

AIA in also member of **Federchimica** (Italian Federation of Chemical Industries), with more than **1.400 members**.

Aia is a member of **FEA** (European Aerosol Federation) and **CEFIC** (European Chemical Industry Council)

## **FEDERCHIMICA**

AIA is a member of Federchimica (Italian Federation of Chemical Industries).

At the moment Federchimica counts **1.400 members** (total employees 92.000) grouped in **17 Associations** and split into **38 product groups**.

#### **FEA**

AIA is a member of FEA (European Aeroson Federation) who represents 350 companies operating in the aerosol sector in 18 countries. FEA is the European voice of Aerosol industry, coordinating and conveying the requirement and the views of our industry to

European authorities and the United Nations.

The result of the activities are: safe and high performance products on the market, research to improve sustainability, codes of practice and guides for safety and innovative products.

#### **OUR ORGANIZATION**

AIA **members** can count on a technical team that shares their knowhow with most updated information regarding aerosol and on a **communication team** that coordinates campaigns and strategies, in order to improve the networking of the Aerosol Industry and to promote a clear and effective communication to the consumers.

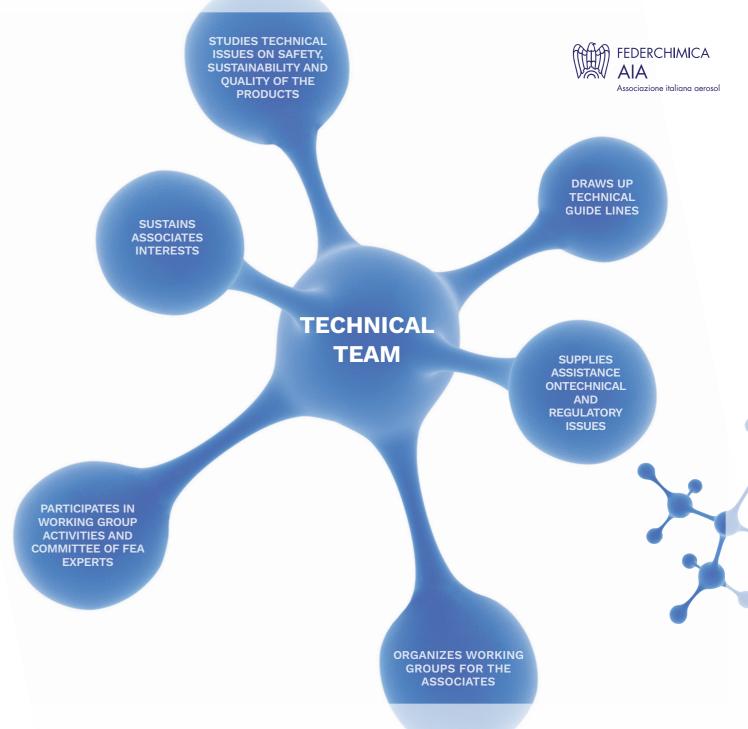

# TECHNICAL TEAM

Giovanni Catalano coordinates the team, made of experts nominated by the associates.

The technical team examines the issues raised by authorities or companies, attends the national and international meetings, draws up guide lines and arranges seminars on specific topics.

**DEVELOPS AND IMPROVES THE** COMMUNICATION AMONGST THE **ASSOCIATES** 

COMMUNICATION **TEAM** 

Communication is a priority for AIA. Either communication towards the associates. in order to improve the networking within aerosol industries or communication towards consumers in order to give them precise and correct information about our products.

The communication team is made of experts coordinated by Giuliana Gazzotti.

The annual Assembly is considered a unique

experience, where the associates can meet together for training, education and teambuilding

**WORKS TO IMPROVE** THE IMAGE OF AEROSOL **INDUSTRY** 

> **COMMUNICATION** TEAM

> > to strengthen the idea that only as a team we can face the present and the future of our Industry.

> > Aia uses several instruments to keep a strong connection

**COLLABORATES WITH OTHER ASSOCIATIONS** AND ENVIRONMENTAL **AUTHORITIES FOR** PROMOTING THE **SUSTAINABILITY OF AEROSOL PRODUCTS** 

with the associates like: website, newsletters, brochures and videos.

# COMMUNICATION ACTIVITIES WITH OTHER ASSOCIATIONS

AIA promotes activities together with Associations linked to the Aerosol world.

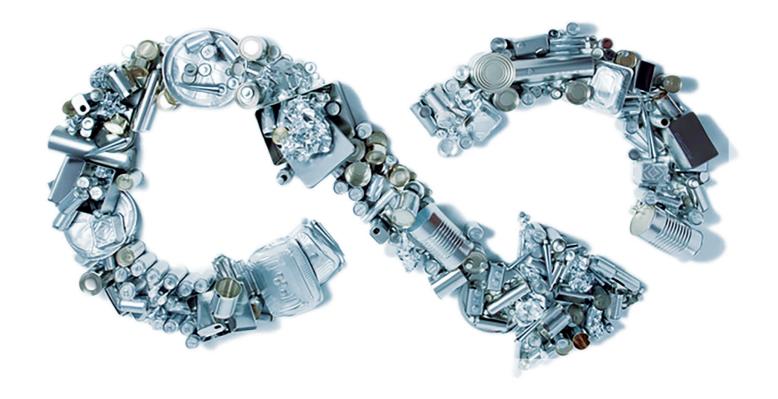

They collaborate with **ANFIMA** (Association of

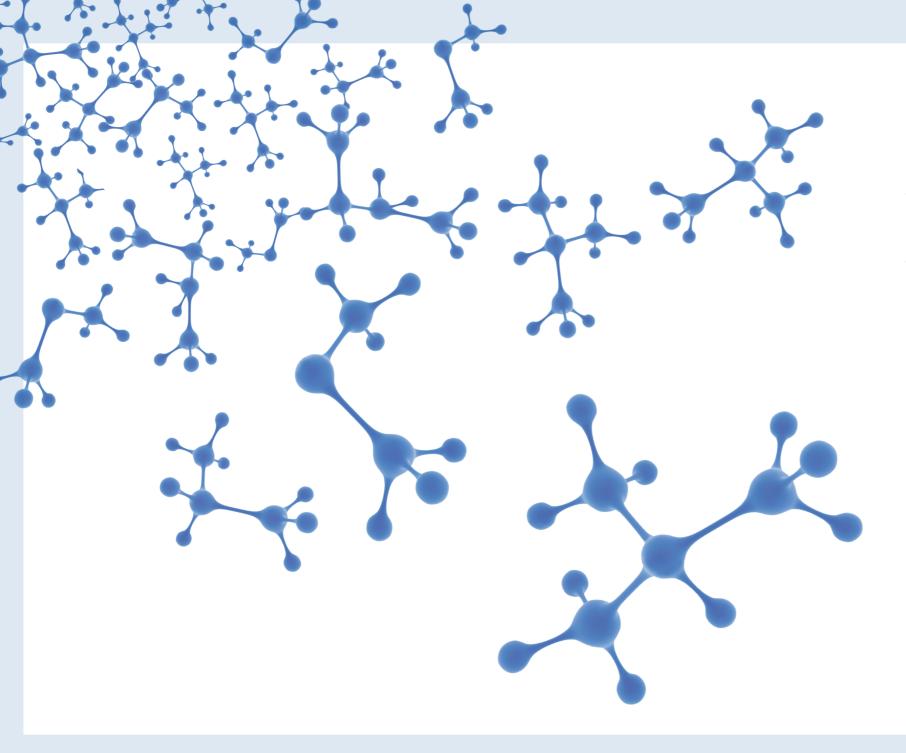

metal packaging producer) and RICREA in order to promote the sustainability of metal packaging.

AIA sustains the European campaign "Metal recycles forever" using the logo on the packaging.

Metal packaging are easy to collect separately and can be recycled endlessly.

# WHY BECOME AIA MEMBERS

**AIA** supports companies in facing the increasing complexity of rules and legislations in Aerosol.

Thanks to a strong link with Federchimica, Confindustria and FEA, AIA is part of a national and **international network** amongst Aerosol, Cosmetics, Households, which enables them to provide support on subjects that go beyond Aerosols, such as logistics and transport, work safety, sustainability, product safety and labelling.

Thanks to a **strong network of institutional relations** on both national and European level, AIA can pursue strategic matters related to the aerosol sector.
